

Dear Trading Friend,

Trading is big business and it is getting bigger every day. Many professional traders are exploiting powerful concepts and strategies to outwit the unknowing trader.

You must learn, improve and keep up with these traders if you are to be successful in this business. It is not difficult, but it does require a little effort on your behalf. There is no doubt that most people lose substantial amounts of money to the professionals. You must learn to become a professional trader sooner rather than later.

From my previous programme you have seen the advantages of using price analysis to forecast price moves in advance. Now learn to use Time Analysis to forecast dates of turning points - in advance.

Knowing a price level has been reached on a certain date can be used to your advantage to minimise your risk and knowing which direction to trade. Would this be useful to you?

This workshop will help you to focus on minimising your risk and losses and focus on trading the highest probability setups.

We will spend the beginning part of the morning on improving your technique on price forecasting. We will examine the Dow Jones index over this year and you will clearly see how trading just this market can really bring in amazing returns with pinpoint accuracy. This will be followed by learning Time Analysis and combining this together with Price Analysis.

You will then learn how a simple swing trading application on breakouts can be used to generate wealth building portfolios. This method is simple and yet so obviously powerful.

There are opportunities in very short term day trading setups which you will be able to recognise in minutes. Just think how useful this can be to your toolbox of trading techniques. Risking 5- 15 points to obtain 30 - 70 points within 1 hour is a MUST KNOW strategy. I am the only person teaching this openly.

You will be shown and taught in my usual easy to understand style on how to improve your trading skills. This workshop is a one off for 2004 and is available on a first come basis. Please do not miss this class and prepare yourself for 2005 which is going to offer some sizable moves.

Complete and return the Booking Form immediately to reserve your seat.

I am looking forward to meeting you again and working with you on **Saturday 16th December 2006.**

Kind Regards,

Sandy Jadeja

Course Contents:

- **Fibonacci Time Analysis**
Learn how to use the principle application of time analysis to boost your timing of entries and exits. Where Price Analysis helps you to identify WHERE to get in, Time Analysis will help you to identify WHEN to get in and out of the markets.
- **Simple Swing Trading**
This method will show you how to build up substantial positions in the market using multiple contracts and controlling risk to minimise margin requirements. You will be amazed at the simplicity but effectiveness of this strategy which professional traders and fund managers use to turn small capital into sizeable profits.
- **Day trading with Low Risk**
Learn how and when to enter on a very simple trading technique which is not even taught in the open market. This strategy has extremely small risks and offers large potential rewards. This strategy alone will be worth learning and using for your short term profits.

Also you will...

- Learn a simple 3-day breakout technique which is ignored by the public trader but watched and actively traded by the professionals.
- Know which direction to trade based on the 1st hour of trading. This is useful for income based trading for short term traders.
- Learn how to correctly use indicators for medium term trend trades.
- Know when to increase or decrease your trade size by using an important indicator used by every single professional trader. You must know how to use this too.

You must attend this workshop and learn techniques and strategies used by professionals to outwit the public trader.

This is the only available Workshop in the UK for providing techniques not available on any other course.

BOOKING FORM

- ✓ Yes I would like to join the Price and Time Analysis Trading Techniques Workshop for Saturday 16th December 2006 from 9am - 6pm.
- ✓ I hereby agree to keep all of the details taught on the course totally confidential and will not divulge any of the contents to a third party.
- ✓ I am replying within 7 days and therefore enclose a payment for £499.00

Please return completed form to:

PLEASE COMPLETE IN BLOCK CAPITALS

FORENAME: _____

SURNAME: _____

ADDRESS: _____

POSTCODE: _____

TELEPHONE: _____

MOBILE: _____

EMAIL: _____

(please circle as appropriate)

CHEQUE: I enclose my cheque for **£499.00** made payable to **SIGNALPRO**

CARD: I authorise you to debit my SWITCH / DELTA card for **£499.00**

Card no. _____ Expiry date: _____

Valid from: _____ Issue no: _____

Signature: _____

SignalPro 22 Rutland Gardens, London N4 1JP. United Kingdom
